SEASON'S FIRST WHEAT DELIVERY FINE SAMPLE

The first delivery of spring wheat in this district was made on Wednesday to the Searle Grain Company's elevator here by Ed. Carlson, which weighed No. 1 northern and weighed 60 pounds to the bushel. The wheat yielded 20 bushels to the acre. Mr. Carlson discontinued combining until the first of next week as he encountered some green spots.

Mrs. B. Anderson has been confined to her bed this week, suffering from an attack of the fluenza.

Mrs. W. Isacson is a patient in the Claresholm hospital, having contracted typhoid fever. Mrs. Isacson's condition is fair.

Hon. Peter Dawson, Speaker of the House, and family left Edmonton at the close of the session to spend their holidays at the coast.

Dr. and Mrs. E. H. Freeze returned to Champion Tuesday, having spent the past two weeks holidaying in Missoula and Yellowstone Park.

Little Miss Marlene Dobbs of Vulcan spent several days this

week visiting at the home of Mr. and Mrs. H. T. Lamont.

A group of girls from town and district, under the leadership of Mrs. James Walker and Mrs. R. Bond left Wednesday for Willow Creek, where they will camp for four days. The girls had planned to camp at the Bar U, but after consulting Dr. Freeze were advised against such a move as the water is low and very likely infectious. E. Griffin and K. McLean transported the campers to Willow Creek.

With the busy harvest season just around the corner, farmers particularly will appreciate any little extra service that can be given them during the rush season.

Business men in every line of business should make it known to their customers that every available service will be pressed into action to fill orders and make deliveries to the farmers allowing him to remain on the job and push the harvest work along so that delays may be cut down to a minimum during harvest operations. Delays are costly, and they must be avoided as much as possible once harvest is in full swing. The season may be short, and your assistance at this time will help save a much needed crop.

THE WORLD OF WHEAT

By H. G. L. STRANGE,
Searle Grain Company, Limited

Sir Charles Saunders is dead. His money, and the fruits of his labor, however, will live for countless years.

Aided by the efforts of his brother, Percy, and of his father, Dr. William Saunders, Sir Charles, in 1907, originated the famous Marquis wheat. Marquis came at an opportune time when the western wheat area was expanding to the north, so that sterling variety, Red Fife, was becoming treated in the late summer. Marquis, a week earlier than Red Fife, and of the same high quality, has it is computed, added not far short of one million dollars to the pockets of Canadian and American farmers.

Marquis is equally noted as a parent for breeding purposes. The famous variety Reward, the rust-resistant Thatcher, and other valuable sorts, being direct offspring from it.

Sir Charles was one of those true agricultural scientists, of which Canada is fortunate in having many in her service, who inculcate their lives to the improvement of agriculture, to the increasing of the farmer's welfare, and to making available to the people of the world a plenitude of food. Millions of people, the world over, who have never heard his name, are better off because Sir Charles Saunders lived and labored.

The best method to harvest crops in this district, due to the presence of weeds, resulting from the abundant moisture, is causing considerable discussion. In numerous instances, straight combining, appears impossible and in consequence the grain is being swathed. Swathing is also under way, while a few farmers are heading their grain. Fields are also ripening uneven which makes straight combining difficult. Grasshoppers still appear in numbers and are causing damage to the ripening grain. It will be from two to three weeks before combining is general throughout the district.

NORTH PRISCILLA CLUB VISITS WATERTON LAKES

By Miss ROY BURNS

Leaving Cameron falls, it was about half a mile to the beach. Turning our eyes to the south east, we could see the rippling shadew water, bordered by lush blue mountains. The waves dashed up on the shore swishing the water to a foam.

After sitting on the shore a few minutes some one cried "Look! here comes the boat." Floating on the lake, in our view, was a white boat, her flag fluttering in the strong breeze. She stayed close to the side, as if hugging a strong wind.

Some of the ladies took off their shoes and stockings and paddled along the gravelly shore, but the water was icy cold. We lounged around the beach for about two hours drinking in the gorgeous scenery, and then off home again. The traffic was very heavy, this being Sunday and the 4th of July.

After supper we went down to the tennis court, and then off to the boat house. We could hear the "put, put" of the motor boats far out on the water. Some men were fishing off the beach. About 9 o'clock we could hear the "ching, ching" of the launch gradually coming closer. As she drew up to the wharf, the passengers were mostly singing. We came home then, and off to bed.

CONTINUED NEXT WEEK

Gasoline Prices Remain Fairly Uniform

Gasoline has its brands and its differences in quality, but it is first and last a motor fuel. As such, however high its quality, it must compete on a price basis with other motor fuels. For this reason prices of all brands tend to a common level. This tendency has resulted in establishment of country wide prices fairly uniform, except for difference in freight rates.

Contrasted with prices which obtain in other countries where restriction imposed by the state are far greater than any yet imposed in this country, and where gasoline is still classed as a luxury, the competitive system of gasoline marketing in Canada and the United States has been in some measure responsible for the fact that nearly 80 per cent of the world's motor vehicles are in these two countries.

Even in countries which produce their own oil, gasoline prices here are not less than half, in some cases almost one-third of what they are in these countries. Co-operative gasoline prices from a group of cities in America and in foreign countries, illustrate clearly that only on this continent is the price low enough to permit the motor car industry to develop to its full possibilities. Art. B-3.

Miss Lillian Peel of Swift Current, Sask. is the guest this week at the home of her sister, Mrs. C. A. Marshall.
